ScienceDirect

- ScienceDirect is an electronic collection of scientific, technical and medical peer-reviewed journals
- Full-text access is provided for over 2,000 journal titles
- Abstracts and excerpts are available for more than 7,200 journals and eBooks

Access Details

- From the VU library website [http://library.vu.edu.au](http://library.vu.edu.au)
- Select Databases & E-journals
- Select the letter S (for ScienceDirect) from the **Alphabetical List of Database Titles**
  or select **Science & Technology** from the **Access Databases Arranged by Subject** drop down menu
- If accessing ScienceDirect off campus you will be asked to enter your student/staff ID number and library PIN

Searching

- Search modes include Quick Search, Advanced Search and Expert Search. You can also browse titles alphabetically and by broad subject area.

Quick Search

- Use Quick Search to search for articles or journal and book titles
- Quick Search is available at the top of every page that has a navigation bar

- **All fields** searches for documents that include your search terms in all fields of the article, chapter or abstract (e.g., membrane technology)
- **Journal/book title** searches for documents that include your search terms (e.g., Water Research) in the journal or book title
- Enter terms in two or more fields to narrow your search results (e.g., articles about membrane technology in the Journal called *Water Research*)
Author searches documents written by an author, even if the terms are in separate author fields (e.g., the search John Smith can retrieve an article written by Randell Smith & John D. Lesure). Use Advanced Search to search for a specific author.

Volume, Issue, Page searches for documents in a specific volume, issue or page numbers.

Advanced Search

- Advanced search provides additional search fields enabling greater precision with searching.
- Click Search on the navigation bar to access advanced search.
- Searches can be performed across all sources, or restricted to a particular source (e.g., journals or books or reference works).

Searches can be restricted by searching within specific fields. To ensure a comprehensive search, start by searching within All Fields.

Sources searched can include all journals indexed in ScienceDirect or subscribed (full-text) sources.

Searches can also be restricted by broad subject area, document type and date of publication.

Click Search Tips for detailed information on search operators.
Browse

- Click **Browse** on the navigation bar to display and browse publication titles alphabetically or by subject.
- Browse results can be filtered for full-text articles (subscribed or freely available titles) by selecting.

Browse through individual volumes and issues of a journal or book title and read the full text (where available) by clicking on the title hyperlink.
Viewing, emailing and exporting options

Viewing

- Article abstracts can be read by selecting the Preview link
- The full-text can be read and saved by selecting the PDF icon
- Alternatively, the full-text can also be read on screen by selecting the article title hyperlink. This option provides links to related articles within ScienceDirect. It also connects key terms from the article with additional research content and experimental data from external sources such as PubMed, GEO and ClinicalTrials.gov.

Emailing citations

- Citations from opened articles can be emailed by clicking on the Email Article icon and filling in the sender’s and recipient’s details
- Citations from one or more articles can be also be emailed by selecting the check boxes next to the desired articles prior to clicking on the email article icon

Exporting citations

- Article citations can be exported to EndNote and Refworks
- Citations from opened articles can be exported by clicking on the Export Citation icon
- Citations from one or more articles can be also be exported by selecting the check boxes next to the desired articles prior to clicking on the export citation icon.
To export records, select a content format (Citations Only or Citations and Abstracts) and the export format RIS format (Endnote users) or RefWorks Direct Export (Refworks users) and click on Export

Export Citation
To export the selected citation + link, select your preferred formats and click Export.
