DATABASE GUIDE

Safari Tech Books Online
Safari Tech Books Online is an electronic reference library for programming and IT professionals. It provides access to the electronic versions of a broad range of technical books from leading publishers such as O'Reilly, Microsoft Press, Adobe Press, Addison-Wesley Professional, Sams and etc. The topics include computing, operating systems, programming, networking, web design, Java and more. The books are full text and fully searchable.

How to Access Database
To access this database go to: http://library.vu.edu.au
1. Click Databases & E-journals
2. Select 's' (for Safari Tech Books Online)
3. Please read general guidelines for database use
4. Click Connect
5. Off campus requires your student/staff ID and library pin number

Search Database
To find a current list of e-books (in alphabetical order by title) subscribed by Victoria University Library click on Bookshelf in the top toolbar or use the toolbar on the left side of the screen to select a subject category you are interested in such as programming or networking.
Click on the book cover image or title to read the book. Click on Start Reading or use the Table of Contents on the left toolbar to navigate within the book
Note: VU Library does not have access to all of the books in Safari Tech Books Online. If you find a book we do not have access then search the library catalogue to find print version.

Basic Search
Type your search term or code into the search box. You can narrow results to book sections containing code fragments by checking Code Fragments only.
Books are listed by relevance with the most relevant sections; your search term will be highlighted.
Click on the book cover image, the title or click on the most relevant section. To sort books by publication date, title (alphabetical order) click the arrows in the top column headings.

Advanced Search
Choose advanced search for more specific searching. Click on the Advanced Search under the basic search box.
Enter one or more terms and select from the options of “all” or “exactly” or “with at least one of these words”. Other search options available in advanced search include “words in book title”, author, publisher, ISBN or primary category (select from drop down box). You can limit your searches by publication date or publisher.
Specific Book Search
“Find a Specific Book “ search is located at the bottom of the left side search bar. Use this option if you are looking for a specific title, author, publisher or ISBN (International Standard Book Number).

Search Results
Books are listed by relevance with the most relevant sections. Relevancy rankings are displayed in the grid as yellow stars. There are a few options to view your results:
View by Book shows the books most relevant to your query, the three most relevant sections within each book, publisher and publication date.
View by Section shows all fields as in View by Book plus a short abstract. All books in Safari are in full text in HTML format with pictures, diagrams, script, and web links (highlighted in blue). Table of contents, index and preface are shown. Your search words will be highlighted.

Other Tips
Common wildcards and operators used in searching this database.

<table>
<thead>
<tr>
<th>Example</th>
<th>Meaning</th>
</tr>
</thead>
<tbody>
<tr>
<td>mod_perl</td>
<td>Finds all sections, in all books, that mention mod_perl.</td>
</tr>
<tr>
<td>mod_perl apache configuration</td>
<td>This query automatically searches for all words in each section. In other words, Safari supports proximity search, and does this by default. So this search finds all sections in which the terms &quot;mod_perl,&quot; &quot;apache&quot;, and &quot;configuration&quot; occur in close proximity.</td>
</tr>
<tr>
<td>mod_perl &quot;apache configuration&quot;</td>
<td>This query automatically finds all sections where the term &quot;mod_perl&quot; occurs near the exact phrase &quot;apache configuration.&quot; When you know you're looking for an exact phrase, quotes make the search more precise.</td>
</tr>
<tr>
<td>&quot;Net::LDAP&quot;</td>
<td>When a term contains special characters, quote the entire term for most precise results.</td>
</tr>
</tbody>
</table>

Printing / Saving / Email
Print or E-mail icons are located at the top of each page. Restrictions apply to the printing of a whole book. Limited downloading applies, as this is a reference service. Pages can only be printed one at a time. Click on the email icon. Enter your email address, subject and any comments. Click on OK. Records emailed will show you the page link only, so you will need to log into the Safari site in order to view the page.
