## **VPN CLIENT**

# 17. VPN CLIENT

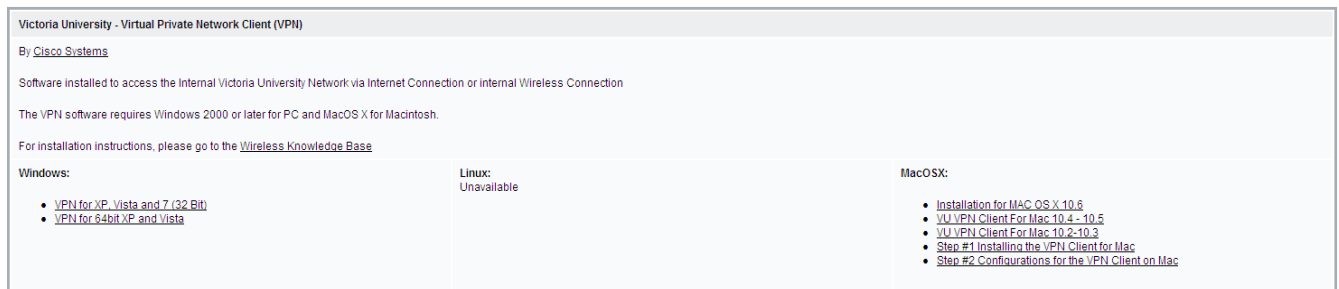

## 17.1 DOWNLOADING VPN CLIENT

### 17.1.1

To download VPN Client you must visit the following link <http://intranet.vu.edu.au/its/Downloads/>  
Please click on the link provided above.

### 17.1.2

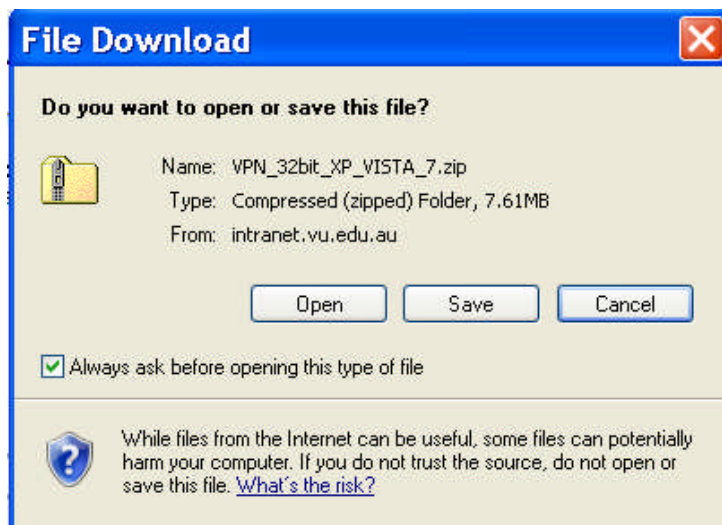

This should take you to the Victoria University intranet. If you are accessing this page from home you will need to login. To login, please enter your **LDAP** username and password (This is the same username and password you use to login to **WebCT**).

Once you have logged in, the intranet page will appear. Scroll down till you see **Victoria University – Virtual Private Network Client (VPN)** as displayed in the picture above. Here you will see the VPN client downloads underlined. You will need to choose the appropriate version of the VPN client for your operating system. If you are using a **Windows operating system**, you will choose from **32-Bit or 64-Bit** on the **left**. If you are using a **MAC operating system**, you will choose the **appropriate version** of MAC on the **right**. There is currently **no VPN Client available for Linux**.

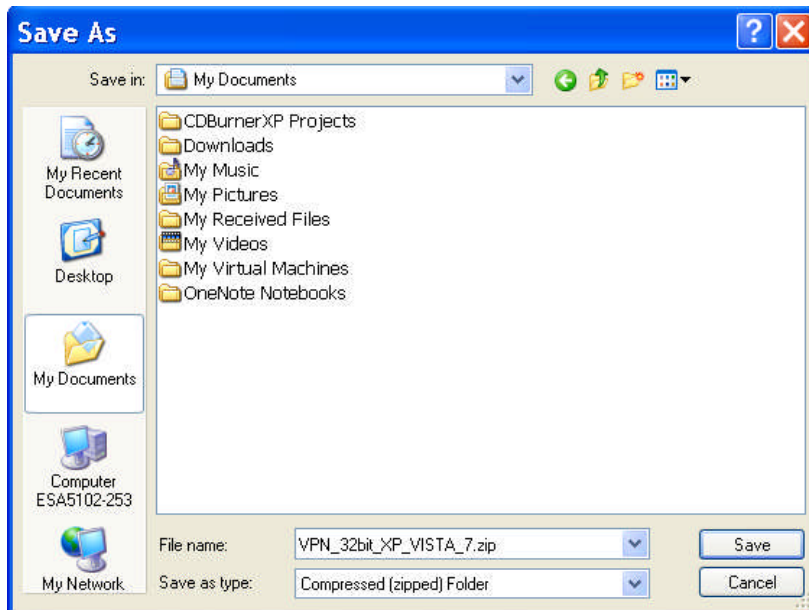

### 17.1.3

Once you have clicked on the appropriate version of VPN client. The following download dialogue box will appear. Click on **Save**.

### 17.1.4

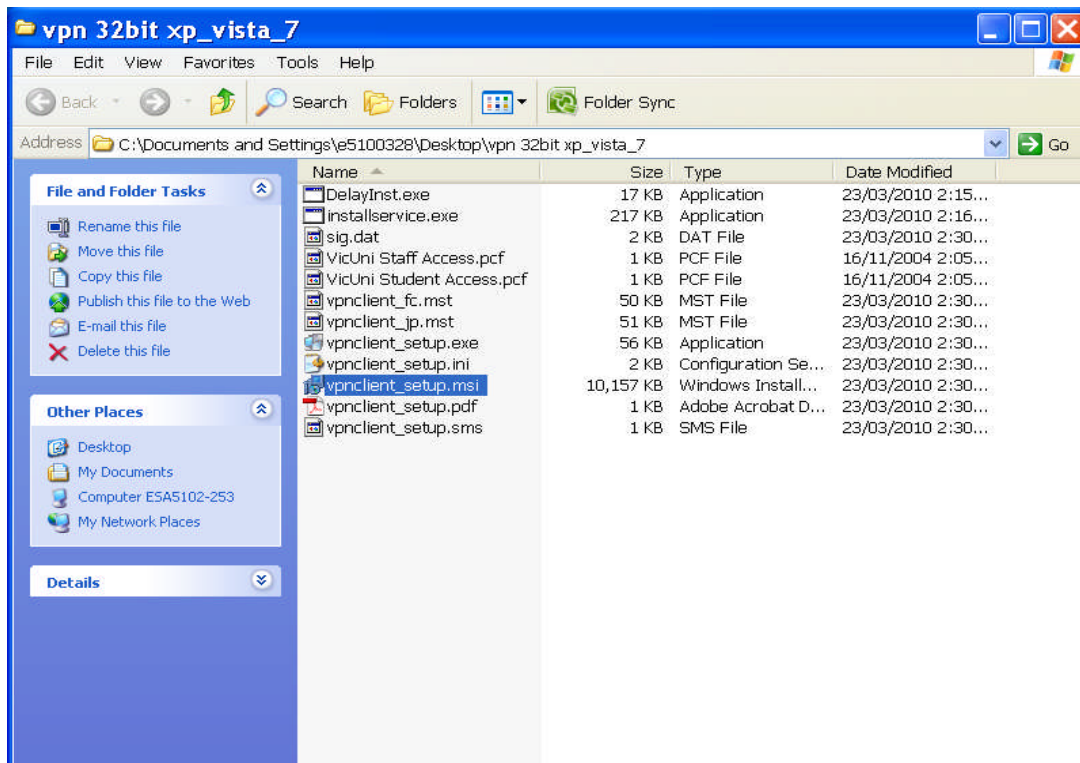

Select where you would like to save the download folder and then click **Save**. Please make sure you save it somewhere that you can easily find it as you will have to find it for the next part of this guide.

## 17.2 INSTALLING VPN CLIENT

### 17.2.1

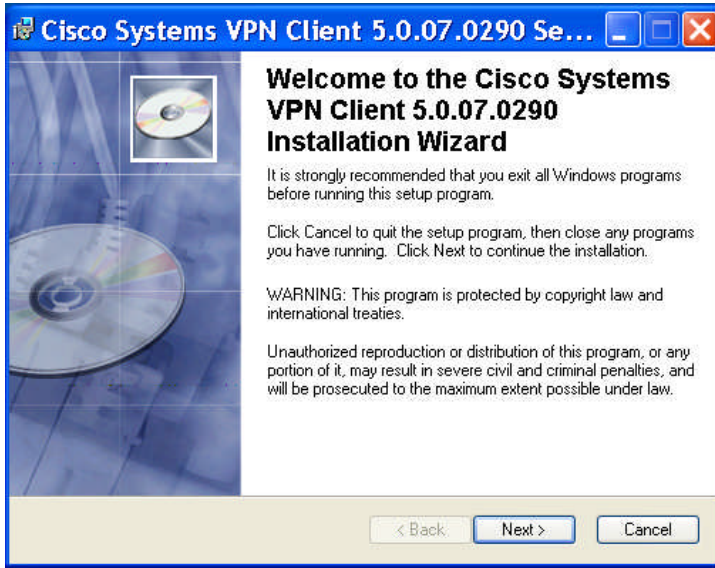

Once you have downloaded the VPN client. Open the folder.

Double-click on `vpnclient_setup.msi`. This will begin the installation.

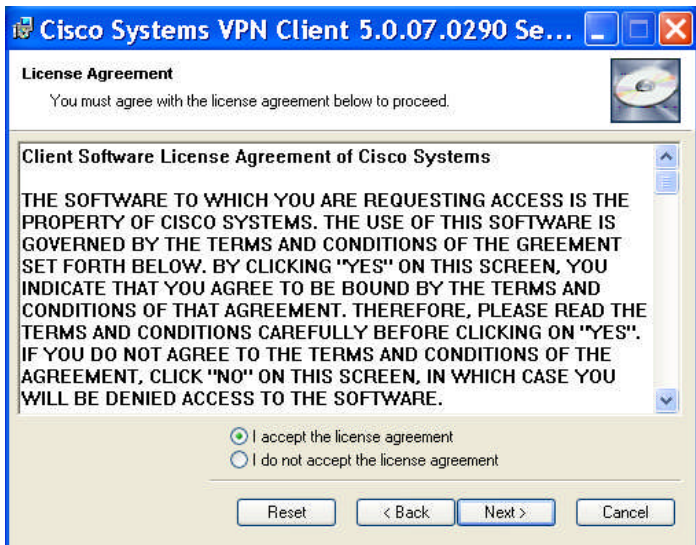

### 17.2.2

The installer dialogue box appears. Click the **Next** button to continue.

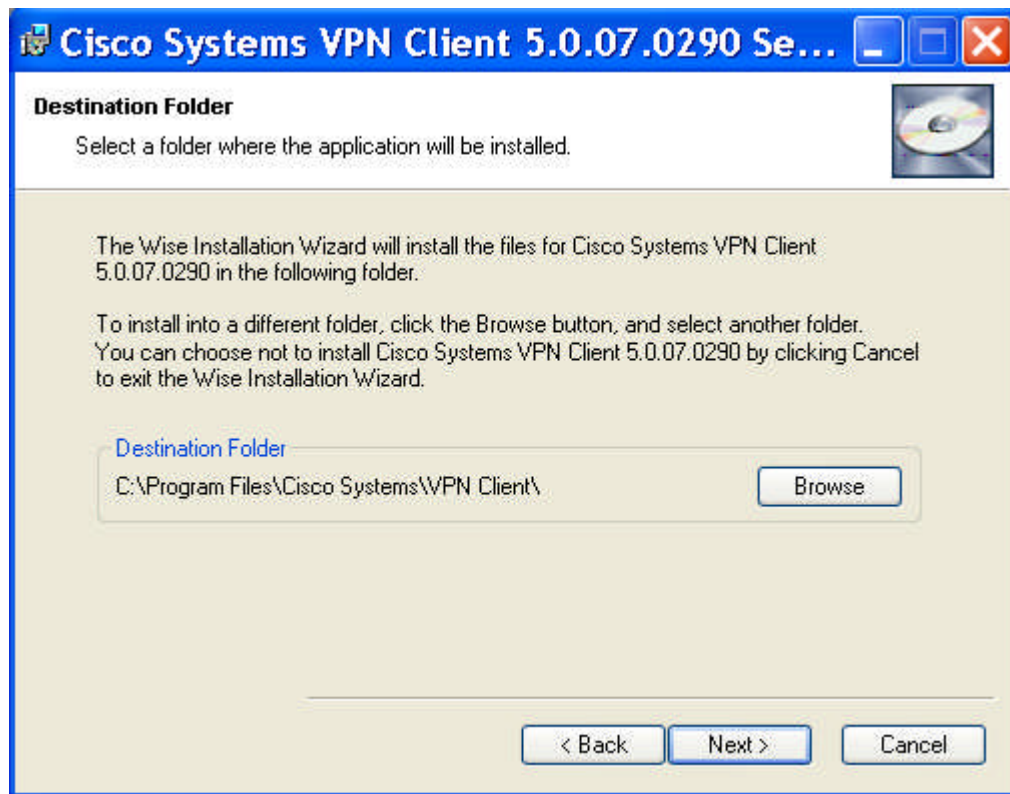

### 17.2.3

Click on the check box stating **I accept the license agreement** and then click **Next**.

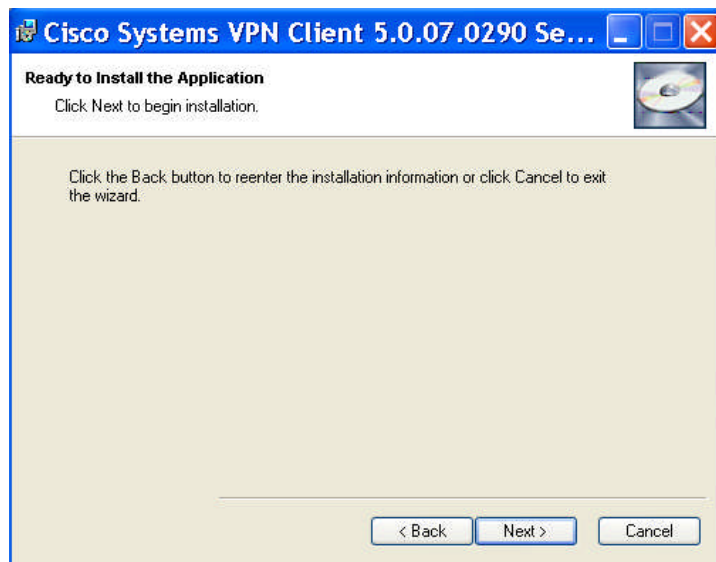

#### 17.2.4

Click **Next** to continue the installation.

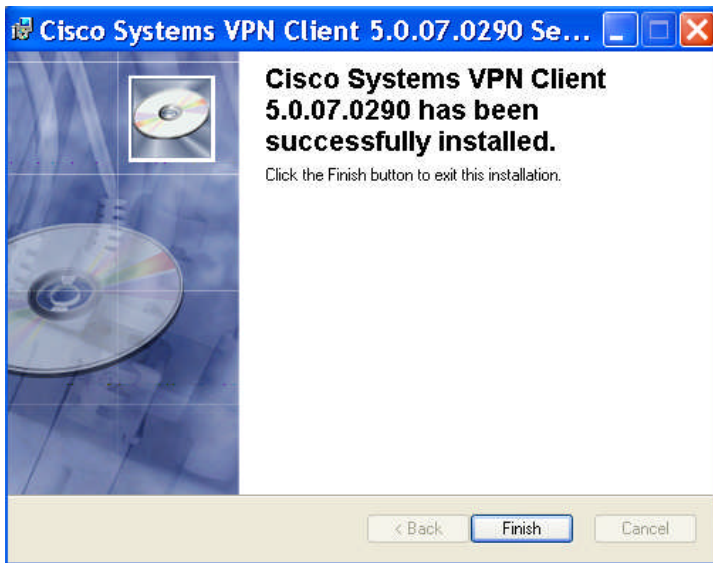

#### 17.2.5

Click **Next** again to continue the installation.

## 17.2.6

Click **Finish** to complete the installation.

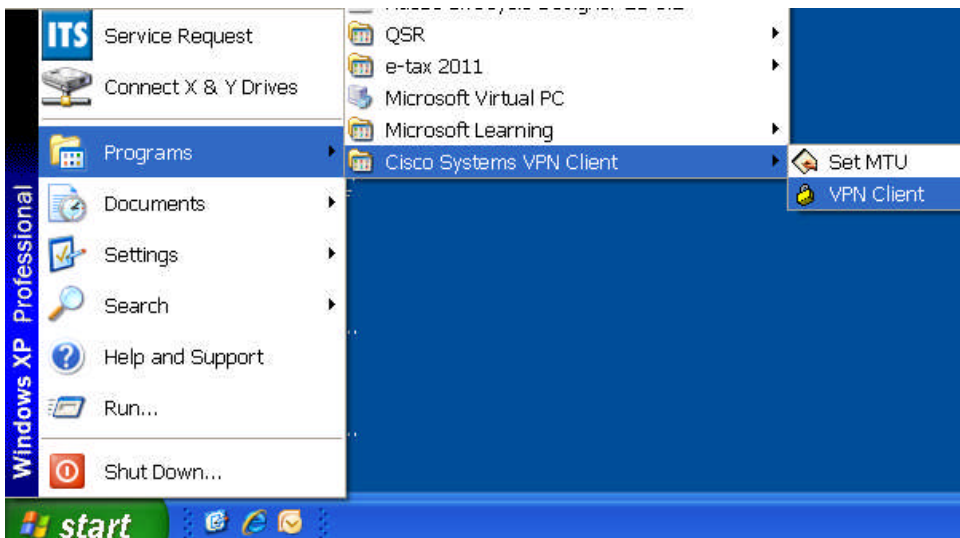

Once you have completed the installation you will be asked to restart your computer. Click **Yes** to continue (please make sure to save anything that you were working on before you click **Yes**).

## 17.3 CONNECTING VPN CLIENT

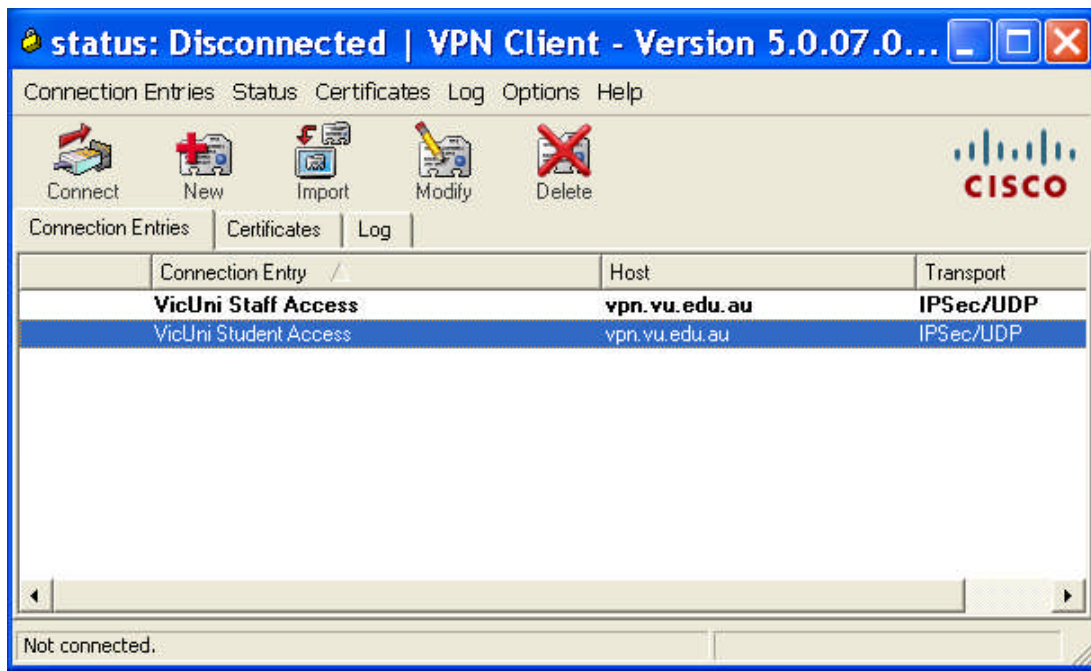

### 17.3.1

To open the VPN Client, click on **Start > Programs > Cisco Systems VPN Client > VPN Client**.

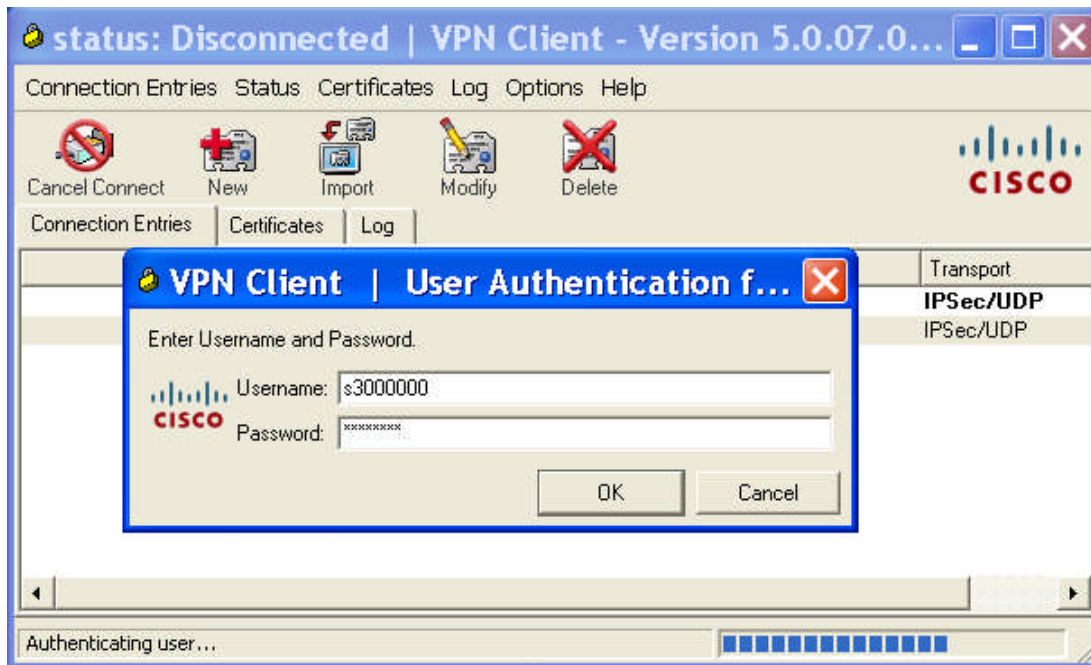

### 17.3.2

Highlight VicUni Student Access and then click on Connect. See image below.

### 17.3.3

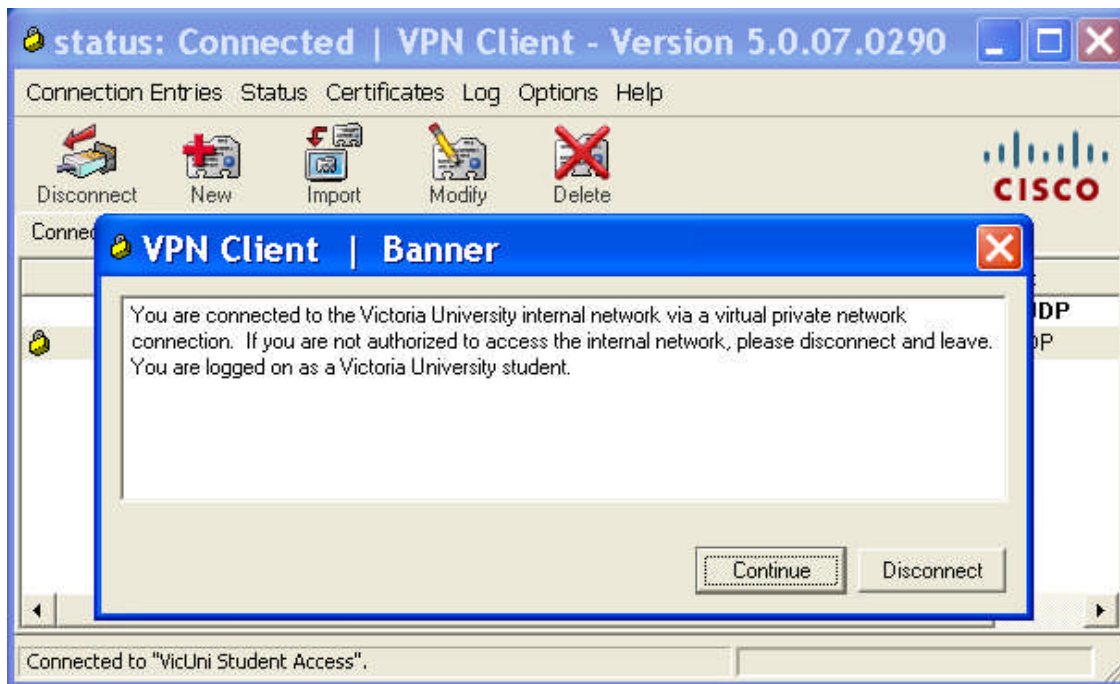

After you click connect you will be asked to enter your username and password. Your username is your Student ID with an "s" in front and your password is the same password you use to login to your student.

After you have entered your username and password, click OK.

### 17.3.4

An authorization message will appear, click **Continue** to connect to VPN Client.

### 17.3.5

Once you have connected, you will see a **yellow padlock icon** in the bottom right hand corner of your screen. This will let you know that the VPN client is **connected**. See image below.

### 17.3.6

To **disconnect** from the VPN Client, simply **right click** the **yellow padlock icon** and select **Disconnect**. See image below.
